

# Christmas Tree Basics: Fluffing & Lighting

**The key to a wow-worthy tree? Fully fluffed branches and perfectly placed twinkles! This video will show you how to do it.**

## **TIPS & TRICKS:**

- **The Store the Merrier:**

To prevent smashed branches and to make your tree more compact, wrap it with twine before storing—that way, it'll be easier to fluff.

- **Show Your Fluff:** Fluff your tree from the top down and from the center out. Point inner sprigs up, and as you work outward, begin angling them towards you. Outer sprigs should point straight out.

- **The Light Side:** Wrap the lights around each branch, working from the back of the branch out and then back toward the center. This will hide the cord and give the tree an all-over glow!
